From Chairman's Desk

Dear Prospective Students,

As Chairman & Founder of Gleneagles Global Hospitals Group, I extend you a hearty welcome on behalf of Global Hospitals & Health City, Institute of Allied Health Sciences, faculty & staff.

Profession in Healthcare has been revered in human society since time immemorial for its role in healing people. Despite a growing global demand for paramedics & doctors at all levels, the educational opportunities continue to be limited and costly. As a result, a large pool of candidates often compelled to select alternate careers.

It is here that Global Hospitals & Health City offer a chance to fulfill your aspirations at affordable cost, so as to be part of medical profession.

It also heralds our vision, to become a global leader in healthcare & professional education. Our mission is to make a deep & everlasting impact on the minds and lives of students.

With the excellent healthcare delivery base, Global Hospitals group, which include the state of the art of quaternary care and multi-organ transplant centres, we provide an excellent teaching and training facilities that will enable our graduates to become competent health care professionals.

A handwritten signature in black ink, reading "K. Ravindranath". The signature is written in a cursive, flowing style.

Dr K Ravindranath

Chairman and Founder
Gleneagles Global Hospitals Group

Welcome to

Global Hospitals & Health City Institute Of Allied Health Sciences

INTRODUCTION

Health Care is one of the world's largest and fastest growing industries. India has become one of the most favoured destinations for Medical Tourism due to its high quality health care facilities at competitive costs. India has a number of world class corporate hospitals equipped with the most advanced technology and highly qualified/experienced clinicians. In providing advanced patient care of International standards, these clinicians are supported by Allied Health Professionals. Thus India requires more than one lakh allied health care professionals annually besides the existing 50,000 vacancies. To address this urgent need, we are offering the following four year job oriented and job assured degree programmes in our institution.

- ▶ **B.Sc. in Radiography & Imaging Technology – 10 Seats**
- ▶ **B.Sc. in Critical Care Technology – 10 Seats**
- ▶ **B.Sc. in Dialysis Technology – 20 Seats**
- ▶ **B.Sc. in Accident & Emergency Technology – 10 Seats**

PG COURSE

- ▶ **Master of Hospital Administration – 10 Seats**

About us

Global Hospitals & Health City (GGHC) is the brain child of a visionary, **Dr. K. Ravindranth, M.S., FRCS(Edin), FRCS(Glas)** - Chairman & Founder – Gleneagles Global Hospitals Group with a view to bring 'World class Medical Care' to India and provide it at affordable costs to the ailing masses.

Any college in Health Sciences which wants to impart best education to its students should have its own health care delivery partner in the form of a tertiary care hospital. Our NABH accredited hospital in Chennai, serves as a domain of knowledge and practical learning to the students of GHHC Institute which was started in the year 2010 as **Global College of Allied Health Sciences** in Chennai. Having established itself as the forerunner in realm quaternary care, this multi super speciality hospital will provide endless learning opportunities.

VISION

To be a global leader in providing value-based integrated healthcare education and training.

MISSION

Foster world class knowledge for the enhancement of healthcare industry to make a difference in people's life.

Programmes

► **B.Sc. in Physician Assistant**

Physician Assistants are qualified by academic and intensive training to assist Physicians and Surgeons in a Health Care setup. Their major responsibilities are to give patient care and do patient oriented research. They work closely with or under the direct supervision of Physicians or Surgeons in patient care, medical research and management. This graduate study provides a comprehensive foundation in basic and advanced Medical informatics and Health management.

Our training will provide a wide range of diagnostic, therapeutic and preventive health care service experience, which prepares them to conduct Physical examination, Diagnose and Treat illness, Indicate and interpret diagnostic tests, Counsel on preventive care, Refer patients to specialists as required and also to assist in Surgeries.

B.Sc. in Operation Theatre & Anaesthesia Technology ◀

Operation theatre professionals, the backbone of Operation Theatres manage and organize the entire surgical theatre in a Health care system. They monitor transfer of patients, look after surgical instruments, Sterilization, arrange operation theatre table, dressing table, instrument table and anaesthesia table. Further, their responsibility is to keep ready all the drugs, anaesthesia gases, drapes and linens for the procedures. They also help clinicians in Scientific Research and Development. Our teaching and strenuous training will prepare the students to be proficient in fundamental medical concepts and procedures related to operation theatre techniques including ethics/ discipline, Infection control, Maintenance and Emergency Management.

► **B.Sc. in Radiography & Imaging Technology**

Medical Imaging Professionals play an important role in health care profession for carrying out diagnostic image analysis. This course prepares the graduates to be competent in the art and science of Radiography and Imaging Technology. The content of the course includes Anatomy, Physiology, Basic Physics, Radiation Physics, Radiography, Hospital Practice and Patient care, and so forth. The Department of Radiology in this Institute is one of the best-equipped departments of its kind in the country. We train the students in assisting the clinicians for scans, X-Rays, Ultrasound, CT, MRI, PET scan, Medical Image Equipment protocols, Radiation Safety and Technology.

Programmes

► B.Sc. in Critical Care Technology

Critical Care Technologists, specially trained health care professionals, work mainly in Medical and Surgical Intensive Care Units. They react rapidly to changes in patient's condition and save the patient's life timely. They have strong understanding in human physiology and how biomedical technology supports during critical illness. Some of their important functions in the health care setup are; Patient monitoring for various diagnostic procedures, Physiological Monitoring, Biomedical Equipment Management, Materials Management, Patient Transfer, Risk Management, Research & Development.

B.Sc. in Dialysis Technology ◀

Dialysis Technology prepares the students with necessary medical knowledge and practical skills in Dialysis, to work under the supervision of Medical Professionals. These students will learn to counsel patients, write case history, disinfect/prepare patients, and connect patients to various monitors/machines and monitor patients during therapy. Students also learn various aseptic techniques to be followed during and after treatments.

► B.Sc. in Accident & Emergency Care Technology

"Serving hands are greater than praying lips". These words are more suitable for Accident and Emergency Care Technologists. They act as life savers by assessing and treating people at the scene of an accident or at the time of the medical emergency/trauma. They are the highly trained professionals who carry out life-saving procedures such as Cardiopulmonary Resuscitation (CPR), bleeding control, splinting broken bones, etc. and administering drugs or the spot, sometimes under difficult conditions. Accident & Emergency Care Technology is a challenging and exciting speciality that provides knowledge and practical skills of dealing with multiple types of patients. Also the course gives you the opportunity to keep a good knowledge of most specialities and opens up the scope of where you can develop a specialist interest.
